A TV
DOCUMENTARY
SERIES

THIS TV SERIES FINDS INSPIRATION IN THE RHYTHMS OF NATURE AS SHOWN THROUGH THE WONDERS OF THE ANIMAL KINGDOM. IT EXPLORES AND EXPLAINS DIFFERENT ASPECTS OF ANIMAL BEHAVIOR, INCLUDING HUNTING TECHNIQUES AND FEEDING HABITS, FAMILY RELATIONSHIPS AND DEFENSE MECHANISMS, AND COURTSHIP AND MATING RITUALS.

THE WILD ONES

Who's the King ?

13×26 min. HD

01. THE BIGGEST ON LAND

• ELEPHANT • GIRAFFE • Other Contenders...

In the modern world, the largest land animals are the several species of elephants native to Africa and Asia. Biggest of all is the African bush or savanna elephant, which inhabits a patchy range of sub-Saharan Africa, favoring open woodland, scrub and even desert environments.

02. THE MOST DANGEROUS ON LAND

• WILD CATS • THE SCORPION • VENOMOUS SNAKES..

The Most Dangerous Animals episode offers an exciting look at nature with close-ups of wild cats, snakes, crocodiles, scorpions, etc., focusing on the animals' methods of defense or predation (venom, teeth, claws, size, etc.). In this episode you will learn everything there is to know about the wild world of dangerous animals.

03. THE MOST DANGEROUS IN THE SEA

• THE SKARK • STONE FISH • SEA SNAKE....

As we know the seas are an interesting place. It's also a treacherous realm full of dangerous animals. We should be careful while we're enjoying the seas, especially when diving. This episode provides a survey of the world's many dangerous marine animals.

04. THE FASTEST

• CHEETAH • ANTELOPE • BLUE WILDBEEST • LION....

This episode features animals that move at extreme speeds when they jump, run, or fly. Some of the animals shown include a kangaroo, a zebra, a lion, and a bald eagle.

05. THE SMARTEST

• DOLPHIN • DOGS • CHIMPANZEE...

Earth is filled with a wide variety of creatures. Living organisms need to hear, think, see, and adapt with precision in order to evolve, flourish, and survive on this planet. It is amazing to see that some animals actually have a certain sense of natural instincts that are unknown to humans. Animal populations are much smarter than many humans give them credit for. We will see that they have their own languages, mannerisms, rules, and methods of survival.

06. THE LONGEST LIVING

• TORTOISE • ELEPHANT • SWAN...

For most animals life is short and harsh. However, some animals have lived significantly longer than one would expect of their species. This episode features a few examples of the longest-living animals.

THE WILD ONES

Who's the King ?

13×26 min. HD

07. THE CUTEST BABY ANIMALS

• BABY KOALA • BABY BEAR • BABY CATS ...

Baby animals are cuddly and adorable. This episode consists of beautiful footage of 10 different baby animals. Each segment begins with the question of what the baby animal is called, to engage toddlers so they can learn a little about the species. After that it, it is hard not to fall helplessly in love with them.

08. THE MASTERS OF THE SKY

• PELIKAN • KESTREL • BUDGERIGAR

Birds are some of the world's most intriguing creatures! We will fly with amazing birds over deserts, seas, woodlands, and lush rainforests. From pelican to chattering parrots, kestrels to eagles, there are lots of feathered friends to meet in this episode.

09. THE MOST VENOMOUS/POISONOUS

• KOBRA • SCORPION FISH • SPIDERS

This episode gives an introduction to the world of venomous animals and how they use their poisons. Venomous creatures such as snakes and spiders are the stuff of human nightmares. Yet toxins are a regular part of the animal world, an essential tool for hunting and defense. From the mighty King Cobra, which can reach over five meters in length, down to the diminutive but lethal Black Widow Spider, we will learn more about them.

10. THE LIVING PREHISTORIC

• CROCODILE • THORNY DEVIL • KOMODO DRAGON

This episode ranges from the thorny devil in Australia to crocodiles and everything in between. The camera looks at the habitat range, breeding strategies and survival techniques of this fascinating array of animals and showcases extraordinary reptiles from the three meter long Komodo dragon to the gentle giant tortoises of the Galapagos.

11. THE STRONGEST

• ANTS • CAMEL • POLAR BEAR

This episode takes a look at several animals that use their strength to survive in the wild, many of which can lift objects many times their weight.

12. THE PREDATORS

• LION • SHARK • CROCODILE

A predator in the animal kingdom is an animal that eats other animals for food. They can be as small as a spider and as large as a grizzly bear. Predators can be found all over the world in almost any habitat. But they are not always the bad guy. Predators help keep the ecosystem in balance.

13. THE WILD ONES: WHO'S THE KING?

The top ten of the different species covered in the series: the longest, the best predator, the strongest, the smartest.....
